EXPERIENCE

Software Engineer

ValueLink. US, Remote.

07/2022 - 10/2023

- Designing, coding, and debugging software applications using the .NET framework and associated technologies delivering high-quality scalable solutions.
- Implementing security best practices, identifying potential vulnerabilities, and safeguarding the application against security threats.
- Providing technical support to end-users or other internal teams, addressing software-related issues, and providing solutions.

Junior Software Engineer

Vertika.tv

01/2021 - 06/2022

- Designed and Developed a manual Kiosk layout software in 3 months, generating huge profits for the company using Blazor.
- Added functionality in screens for screen monitoring using ASP.NET.

Projects

VLCogent

- Cogent is a data intelligence platform for appraisal management companies, where they import their large datasets and can visualise various statistics based on that data to make strategic decisions for their businesses. The product was also presented in Digital Mortgage 2022 in Las Vegas

App-Tech Stack: Angular12, Angular-gRPC, .NET6, gRPC Server, MongoDB, Redis, SignalR, Azure Blobs

CogentCRON

- A data migration tool for Cogent that allows collaboration with legacy products to pull data from SQL, process it according to the views in MongoDB, and store it in MongoDB.

App-Tech Stack: .NET6, SQL, MongoDB, Redis, Azure Services

SUMMARY

Software Developer with 3+ years of full-stack experience. During the past few years I have been focusing on designing and enhancing backend applications.

SKILLS

Javascript	Advanced
Typescript	Advanced
Angular	Advanced
NodeJs	Intermediate
Next.js	Intermediate
Microservices	Advanced
MongoDB	Advanced
MySQL	Intermediate
gRPC	Advanced
.NET Core	Advanced
Sentry, Serilog	Advanced
.NET6	Advanced
Razor Pages	Intermediate
Azure	Basic
Redis	Advanced
SignalR	Advanced

LANGUAGES

English	Fluent
German	Basic

EDUCATION

Bachelors in Science Computer Science
(2018 - 2022)
FAST National University of Computer & Emerging Science
